Letter of Protest

Wetlands Application 09-26
VMRC # 09-0806

We, the undersigned, are submitting this letter in protest of the above referenced application for shoreline development at 102 Creek Circle, Seaford, VA. We, the surrounding citizens on Creek Circle and Cabin Creek, acknowledge that the existing shoreline structure is providing adequate erosion control, and that a traditional blue crushed stone seawall would accomplish the same, while adding value and protection to the parcel.

Our concerns stem from the fact that there are adjoining channels on all sides of the proposed developments, and introducing fill dirt in any amount would put the navigability of our canals in jeopardy. OR ANY UNPREDICTABLE SYSTEM OF SPURS, REVETMENTS & BREAKWATERS

We ask that you, the board, recognize that the risks of failure are borne by us, and uphold your obligation to protect the rights of the existing residents, by rejecting any proposal that involves comprehensive restructuring of the shoreline protection and particularly any application that is reliant on placing fill dirt into the river.
