

Internal Service Fund - Vehicle Maintenance

Vehicle maintenance is accounted for by the County via an internal service fund which functions as a reimbursement devise. Its customers are user departments of the County and other governmental entities and these projects are funded primarily from user charges and interest earnings.

VM-8800 Vehicle Maintenance Building Addition

Funding is to add a truck and equipment shop with a 6-bay maintenance wing adjacent to the parts storeroom. The wing would have bay space for large trucks and fire equipment. The current space was built to support a broad range of lighter vehicles and the fleet size has doubled.
