Applications for permits shall be accompanied by a plat plan showing, to scale, the size and location of all proposed new construction, distances from lot lines, the established street grades and the proposed finished grade consistent with the approved development plan and location of private and public easements and rights-of-way. Construction within easements and rights-of-way shall be prohibited unless the applicant provides evidence that the owner or beneficiary of the easement or right-of-way has authorized the construction.

Any permit issued shall become invalid if work on the site authorized by the permit is not commenced within six months after issuance of the permit, or if the authorized work on the site is suspended or abandoned for a period of six months after the time of commencing the work, the failure to complete enough work to schedule an inspection during any six-month period may be grounds for finding that work has been abandoned or suspended; however, permits issued for building equipment such as plumbing, electrical and mechanical work shall not become invalid if the building permit is still in effect. Such fee shall be charged to the holder of the permit covering the work and shall be paid to the County at the office of Building Regulation prior to the re-inspection of such work.
