

Contagious Disease Preparedness

A contagious disease emergency could affect many people. It could cause mild illness, hospitalization, and/or death in certain cases. In the event of an infectious disease emergency, the Peninsula Health District may provide up-to-date information and instructions to the public through media and public outreach sources.

Being Prepared

To find out how to prepare yourself and your family for a contagious disease emergency, visit the Centers for Disease Control and Prevention website. The York County Department of Fire and Life Safety website will also provide important information about contagious disease emergencies.
