	Project/Applicant Name	Location	Description	Comments
Site Plans Submitted	Walmart MFC Expansion	2601 George Washington Memorial Highway	Walmart is proposing to expand their existing online pickup service to keep up with market trends. With the proposed 32,000 expansion (Market fulfillment center – MFC for short) reflects the ability for the online pickup service to fulfill an estimated 1000 orders per day. Pickup orders are controlled by scheduled, one-hour time frame pickups, from 7 a.m. to 7 p.m., seven days a week. The model proposed includes 8 pickup bays, which results in an order process of 10 minutes for each vehicle to check in, secure the order and depart. On average, the current pickup transaction is 4-5 minutes and in-store purchase transaction is 41 minutes (arrival to departure). With the expansion, the existing parking lot and main drive aisle will be revised to accommodate the new building. This project does not propose to increase the impervious area of the subject property and stormwater runoff will discharge and flow into the existing BMP's on site. Existing utilities such as water, gas and electric will be relocated around the building as shown on the utility plan. The existing storage containers located where the new building is planned will be relocated to the specified area on the plan. A bus stop is also being proposed to meet the WATA future plans for this location.	Submitted on August 11, 2022
	Water Street Restaurant	323 A1 Water Street	Proposed renovation project to combine the existing Riverwalk Restaurant and Water Street Grille Restaurant into one unified layout that will take full advantage of the character of the area.	Submitted on August 19, 2022
