Subject: [EXTERNAL] FW: EXTENDED DAYTIME LANE CLOSURES SCHEDULED FOR GEORGE P. COLEMAN MEMORIAL BRIDGE

Good Morning,

Below is a copy of the traffic alert release that went out this morning related to this weekend's scheduled work at the Coleman Bridge impacting southbound traffic. The web sharable version is <https://conta.cc/4ao4RCN>. We posted on social on our [Facebook group page](#) as well [as X / Twitter](#) and the [VDOT website news](#) area, as well.

So far, the crews still anticipate moving forward given the current weather forecast, but I'll let you know should this change. A backup date is already determined and listed in the release, should the work be postponed.

Please let us know if you have any questions,

Sincerely,
Kelly

**EXTENDED DAYTIME LANE CLOSURES SCHEDULED FOR
GEORGE P. COLEMAN MEMORIAL BRIDGE**

Southbound single-lane closures scheduled from 7 a.m. to 7 p.m. on Sunday, March 24,

weather permitting

YORK COUNTY / GLOUCESTER COUNTY— Contractor crews with the Virginia Department of Transportation (VDOT) are scheduled to continue rehabilitation work on the George P. Coleman Memorial Bridge (Route 17) this weekend, requiring extended, daytime single-lane closures southbound.

The southbound single-lane closure is scheduled to take place on Sunday, March 24, from 7 a.m. to 7 p.m., weather permitting. Additionally, between 8 a.m. and as late as 8 p.m. on the day of the closure, all bridge openings will be restricted for maritime traffic until the completion of the rehabilitation work for that day and successful testing has been performed. Marine vessels that do not require a bridge opening can continue to use the navigational channel under the bridge throughout the closure duration.

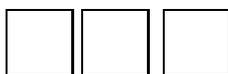

An inclement weather date for this work has been tentatively scheduled for the same time frame on Sunday, April 14.

The George P. Coleman Memorial Bridge is a double-swing span bridge structure over the York River that connects Gloucester Point and Yorktown. This rehabilitation work on the bridge's wedge drive motors requires 12-hour periods of daylight to perform the work safely and efficiently; however, VDOT attempts to schedule maintenance and non-emergency repair work during travel periods when traffic volumes are lower to reduce impacts on motorists.

Before hitting the road, consider using VDOT's free 511 Virginia traffic tools, or the free 511-integrated Waze GPS app, to check for the most up-to-date road and travel conditions. VDOT's [511Virginia.org](https://www.511virginia.org) website and [511 mobile app](#) offer information about construction, traffic, incidents, and congestion, as well as access to traffic cameras, weather-related impacts and more.
