

# COUNTY OF YORK

## MEMORANDUM

**DATE:** April 1, 2024

**TO:** York County Board of Supervisors

**FROM:** Mark Bellamy, County Administrator

**SUBJECT:** Notification of Certain Procurements: New Law Enforcement Building

In accordance with the Board's policy for the procurement of items in the County's approved Capital Improvements Program (CIP) involving goods and services costing between \$50,000 and \$100,000, or when otherwise stipulated by a prior resolution, notification is hereby given that staff has completed the following procurement arrangements as part of the new Law Enforcement building project.

A National Fire Protection Association (NFPA) bi-directional amplifier system was installed in the building, which is needed to amplify the coverage of the existing radio system. The infrastructure and operational processes of the system are built on the Motorola platform. In order to maintain the integrity of all associated systems, proprietary equipment and existing services, the County purchased the product as a practical sole source procurement from Motorola, for a cost of \$79,812.

In response to the need to maintain the health and fitness of the County's law enforcement officers, fitness equipment was also purchased. This purchase was made utilizing a competitively bid, Sourcewell cooperative contract which was awarded to Life Fitness, LLC at a cost of \$75,185. The cooperative contract fulfills all of the requirements of our County's purchasing policy.
