

5: RELATIONSHIPS WITH OTHER LIBRARIES AND INSTITUTIONS

- A.** Libraries in the Hampton Roads area have a long-standing history of mutual cooperation, sharing resources and working collaboratively on projects. The York County Public Library supports and participates in these efforts.

- B.** The public library supplements but does not duplicate or replace the school or college library. It purchases student-type materials if they are also of use to the general reader or for informal self-educational programs. The Library will continue to cooperate with school libraries in order to serve the informational needs of young people as part of the library community.
