

COUNTY OF YORK

MEMORANDUM

DATE: October 27, 2025

TO: York County Board of Supervisors

FROM: Mark L. Bellamy, Jr., County Administrator *BJ for MB*

SUBJECT: Rolling Hills Sewer Basin CCTV Project Notification

In accordance with the Board's policy for the procurement of items in the County's approved Capital Improvements Program (CIP) involving the procurement of goods and services exceeding \$100,000, or when otherwise stipulated by a prior resolution, notification is hereby given that staff have completed the procurement arrangements for Rolling Hills Sewer Basin CCTV inspection.

Vortex has been contracted to perform the Closed-Circuit Television (CCTV) inspection and collect the footage. The collected data will then be provided to Burgess & Niple for Geographic Information System (GIS) integration into the County's AI-powered sewer footage analysis system. This integration will allow for automated processing and evaluation of sewer conditions to support asset management and rehabilitation planning.

The project will establish a comprehensive visual condition record of all mains within the basin, enhance capital improvement planning by identifying priority areas for repair or replacement, and reduce long-term maintenance costs through proactive rehabilitation efforts. Additionally, the integration of AI-enabled analysis tools will support data-driven decision-making and strengthen the County's ability to plan and manage sewer infrastructure efficiently.
