Subject: RE: [EXTERNAL] Pressure Reducing Station update

Hi Mark,

We've completed the storage tank at Tabb and most of the exterior work at the PRS. If you go take a look, you'll see two facilities that have a similar appearance, with the PRS looking more like a library than a pump station .

Outside of the station, the contractors are working on finishing up the trails, the BMP and some of the landscaping. We have been working with the county to get the plats to pass over the ownership of the northern portion of the land to you. We are also working on tying the facility into our 42" force main and expect this to be completed the first week of December.

Inside the PRS, we are working on electrical, instrumentation, plumbing, HVAC, etc.

We anticipate the station to be ready to start up this spring.

Please let me know if you have any questions, and I hope you all have a great Thanksgiving!

Angie

Angela,

Could you provide us an update on the work? Thanks, Mark

Mark Bellamy
