

Colonial Behavioral Health

SERVING JAMES CITY COUNTY, CITY OF POQUOSON, CITY OF WILLIAMSBURG AND YORK COUNTY

November 20, 2025

Dear Senator Kaine:

On behalf of Colonial Behavioral Health (CBH), our Board of Directors, and the communities we serve, I want to extend my sincere appreciation for your support in securing federal funding for the development of our new integrated healthcare campus in Williamsburg. We are deeply grateful for your leadership in championing this project through both the Community Project Funding and Congressionally Directed Spending processes and for ensuring its inclusion in the legislation signed into law on November 12, 2025.

I want to offer a special note of thanks to Congressman Wittman and his staff for their guidance throughout the submission process and for securing \$2 million in the FY 2026 Agriculture, Rural Development, FDA, and Related Agencies bill. Their support was integral in helping us navigate the requirements and successfully advance this project.

This investment represents a transformational step forward for behavioral health and primary care in our region. As the sole provider of safety-net behavioral health services for uninsured and underinsured residents across James City County, Williamsburg, York County, and Poquoson, CBH serves more than 3,500 individuals each year. The federal funding you secured allows us to begin predevelopment activities critical to moving this project forward. We have already issued an RFP for design services and anticipate being under contract early in 2026.

We are grateful for your continued commitment to addressing behavioral health needs in Virginia and for recognizing the importance of building sustainable, accessible care for the future. As we advance through planning and implementation, we will keep your offices updated and look forward to continued partnership.

Thank you again for your support and for your dedication to the well-being of the people we serve.

Sincerely,

David Coe
Executive Director
Colonial Behavioral Health
