

Additional Detail—New Split Range, Robust Enclosure, Improved Facility

Example: A split range allows independent, simultaneous club activities i.e. a target competition and recreational shooting.

Example: A typical cement enclosure example for the range. 8"-10" thick solid concrete or concrete filled masonry block walls, floor and ceiling with 360 degree containment. The specifications will be set during final engineering of the building.

Example: The cement enclosure with the range package installed. A well-lit range, automated target carriers, pulverized rubber bullet trap, and full length acoustic panels.
